

Published by the Quinte Amateur Radio Club

Next Meeting: Wednesday, June 8/55.
Place: Y.M.C.A. Belleville
Time: 7:30 P.M.

PROGRAMME

Demonstration and showing of the club's new mobile Generator.

Final finals for Field Day.

Coffee and doughnuts to fill those resonant cavities.

President's Corner

This month Field Day is the general topic and fellows up and down the bands are really giving it a working over; really don't blame them - Field Day is a lot of fun and I do hope to see all you chaps out on that weekend.

Our Field Day meeting will be at the Y again on June 8th. Howard CAB hopes to have the trailer and generator there so that the gang may look it over and comment. Everyone who plans to operate on FD should try to make this meeting so that final details can be worked out. We are short of operators so if you plan to be at FD and don't make the meeting, let some of the gang know so that you may be included in the schedule of operators.

At this QTH we plan on being away on a holiday at the time of the June meeting. However, our very able Vice President Joe will be on hand to see that all goes smoothly. Best of luck to all during the summer; we hope that you all will be able to take part in the picnic next August. 73 VE3AUU

Coming Events during our summer recess.

Gala picnic to be held at Victoria Park Cobourg Beach August 21st. Clubs taking part will be the Oshawa, Belleville, Kingston and Peterborough Clubs. Lunches will be prepared for serving 1700 hrs. Each family will be required to bring their own grub. Free ice cream will be served to the kiddies. A station will be set up and operating from 1400 hrs. to 1700 hrs. on the day of the picnic. Clare Hunt will supply his SX-72 and Ranger for the stn. and it will run off the Club's generator. We would like as many mobiles as possible to call in on the way to the picnic. The freq of operation is 3740 K/C. Make a party up now for this gala event.

New members and personalities for 1955

Phillip Burton

Bob Sands - VE3 BOB

Charles Young - VE3 BUV

Phil Burton pounds brass for the C.N.R. Telegraph Co. and is working on his ticket. Bob Sands - VE3BOB who is making a good showing on TV is active on the CW bands. Chas. Young - VE3BUV of beat-up convertor fame will be getting the bug again soon.

Dimbulb's Corner: The generator will be at this meeting - come out and get a look at this fine piece of gear. Many thanks to one and all - special thanks to Bill Barrie, Ross Dryden, Harry Overend and Clare Hunt. Some work remains to be done and some cash is needed for a tarpaulin.

A new project is in the embryo stage and plans are being formulated by yours truly for the new project - namely a club house - got any ideas?

Field Day looms near. This is the big event of the year fellows - get out and have fun and make this "do" a real success. A bulletin will be issued shortly covering the organization of this event.

Dimbulb would like to stress the importance at this time of being a member of ARRL. It's our only organized Ham body. Every holder of an amateur ticket should belong to this group not only for his own benefit but for the good of Amateur Radio in general. Send in your membership today and don't forget! The Club needs your support. Look what a little support and work has accomplished in the emergency power department.

VE3NN is now on 2 meters. Dimbulb hopes things will brighten up on 2 meters -- there has not been as much doing on 2 as in other years - but one of these nites NN will work a W1 and from then on he will be a real 2 meter man. Keep up the good work, Gene.

DIMBULB

There will be a notice sent out to all members before the picnic. As this will be the last meeting until September, let's see as many as possible out.

Al Smith 3BCV, Bulletin Editor.
